

## Jouan A12/A14 Centrifuge

### Jouan A12 Centrifuge

The Jouan A12 (fixed speed) and A14 (variable speed) microcentrifuges are robust models able to spin all known microtubes. Tough casing and many safety features.

Both A12 and A14 offer:

Time savings: Rapid acceleration and braking (minimum 4 sec.).

Large choice of accessories: Five rotors for up to 60 samples.

Versatility: Accept all known microtubes including special adaptor for 0.2ml PCR tubes.

Practical flashing seconds timer for accurate control of very short runs.

Observation port for accurate speed control.

Safety: Dual lid interlock; armour plating.

Hinge the full width of the instrument.

Gas strut to support the open lid.

Ruggedness: Chemical-resistant baked-on epoxy painted steel casing.

Space savings: 24 cm wide.

A14 also offers:

Precision: Variable speed. Digital selection of run time 1-15 min + Hold.

Convenience: Digital display of speed. Pulse key for short runs
